Tyler's Odyssey Supervision

Tyler's Odyssey Supervision is the standard for comprehensive pre-trial, probation and drug/specialty courts management for both adults and juveniles. No need to use multiple systems to track and modify offender and case information. From document imaging and reporting to supervisory functions and forms processing—Tyler's Odyssey Supervision does it all.

- Integrated forms generation
- Document management
- Bar-coded file-folder-tracking
- Caseload and phase management
- Assessment and drug test tracking
- Contact scheduling features for officers

Integrated

Supervision is tightly integrated with Odyssey Case Manager for sharing party demographics, charges, hearings, and financials. Eliminate redundant data entry. Increase efficiency. Promote overall information accuracy. Integration enables you to do more with less.

Comprehensive

Supervision is a full-featured adult case tracking and juvenile referral/case tracking system. Integrated forms processing enables you to produce complex documents such as motions to revoke probation, including custom paragraphs for specific conditions. The application's powerful document management and file-folder-tracking capabilities ensure that supervision information is accurate, giving you the full picture.

Track parties' compliance with conditions, drug testing history and treatment placements. Configure risk and needs assessment questionnaires to meet your specific needs. Odyssey Supervision empowers you to cover every aspect of the supervision process.

Financials

Integrated access enables you to view any fees that clerks are collecting and to monitor fees that you are collecting. Track fees as they are levied and collected. Get the full financial picture.

Flexible

Supervision officers can utilize contact scheduling features via an integrated workspace. View current caseloads and the day's hearings and contacts. Available party information extends to relationships, institutions and places of employment. Relevant information displays in an intuitive interface with streamlined data sharing capabilities so that you don't waste time searching for or re-entering critical data. With Odyssey Supervision, you can also perform List Manager queries and actions for mass updates. Reassign an officer's caseload to another and print letters for all defendants who missed their contacts on a given day.
